

### Onshore Application Cables

#### - Mining Cables

Among Special & High Technology Cables it can be referred to Mining Cables and as the source of these

Mining Cables are produced with different voltage levels and various kinds as follow:

- Signal & Control Cables 450/750 V

- LV Distribution Cables 600/1000 V

- MV Distribution Cables 3.6/6 KV – 8.7/15KV- 12/20KV

Among characteristics of Mining Cables are the following:

- 1- Good Mechanical and Tensile Resistant
- 2- Oil Resistant Outer Sheath
- 3- Acid Resistant Outer Sheath
- 4- Flexibility
- 5- Mud Resistant
- 6- UV Resistant
- 7- Moist Resistant
- 8- Using yellow color outer sheath or using yellow lines in
